

Task: Setup a project with page navigation

As quickly as you can, setup some kind of project structure with

- React
- Tailwind
- Shadcn/ui

Use Shadcn/ui +tailwind to add a basic sidebar with navigation buttons and a page with example content.

UI Sketch is provided below, based on shadcn/ui Figma components.

Some artistic creativity is allowed in terms of styling or choice of components.

The important goal is to have a basic navigation structure where it is possible to add many more pages, which individual content on those pages.

Example UI Sketch
